[Pexco's Introduces Ultra-high Performance City Post Surface Mount](#)

Tacoma, WA – Pexco is introducing the City Post SM, which provides a new installation option for its high performance City Post.

In recent testing, the City Post SM set new standards for bolt-down channelizers in durability, ultra-high impact resistance, and superior strength. The City Post SM remains flexible, even at extremely high and low temperatures, and returns to a full upright position even after 100 impacts at 60 mph (100 km/h).

According to Peter Speer, VP of Sales at Pexco, “[One of the most important benefits to road authorities is how the City Post SM can help to dramatically reduce the cost of maintaining channelizer posts over time. Agencies can realize as much as a 74% reduction in costs over the life of these posts, and up to a 90% reduction in risk to workers tasked with maintaining these roadways. We have been in the business of creating products to save lives since 1983. One of the most crucial ways we do that is by keeping workers out of harm’s way with highly durable products like the City Post SM.](#)”

[Enhanced Performance Raises the Bar](#)

The **City Posts** were subjected to severe endurance testing at the Texas A&M Transportation Institute (TTI). The TTI test vividly demonstrated the durability of the City Post, with every post surviving **100 impacts at 60 MPH**. The test deck was designed to subject the posts to the NTPEP test protocol requiring both bumper and wheel-over impacts. The City Post SM meets **MUTCD** and **NCHRP 350** requirements for channelizing devices and is **EN13422** and **EN12767** Certified.

City Posts were subjected to 100 vehicle impacts at 60 MPH!

Key benefits of using the City Post for road authorities include:

- Minimal maintenance required
- Reduced worker exposure to risk
- One post for both high speed and low speed installations
- Long life of post makes this post highly cost effective

Key features of the City Post SM:

- High-performance, superior durability
- Durability of polyurethane
- 360 degree visibility
- All materials Made-in-America!

Davidson Traffic Control Products is a division of Pexco LLC, a global manufacturer of plastic products with decades of technical & engineering expertise. The Davidson Traffic product line includes Type I, II & III Barricades, Channelizer Posts, Curb System lane separators, Work Zone Pavement Markers, Flexible Delineator Posts, Reflectors for Barrier Walls and Guardrails, Snow Poles and many adhesive products that have gained worldwide acceptance.
